Do YOU know what your children are doing online?

We conducted a survey with the children in the federation as we knew how many of them use the internet at home. We thought we should share our findings with you.

85% Believe there are no settings on their technology to keep them safe.	**69%** Sometimes or always wear headphones when online
63% Communicate with people, they know.	**50%** Download Apps without asking an adult
45% Have access to their parents' passwords	**42%** Play games with people they don't know.
41% Say their parents don't always know when they are online	**22%** Talk to or message strangers online because they believe they can tell when its safe
16% Would not report abuse online because they fear the consequence of having their technology removed or because they don't think it's a problem.	**15%** Use games/websites without parent knowledge.
12% Admit to being unkind when online	**6%** Admit to using website/games they are not allowed to use

Many of our children believe that they know more about internet safety than their parents.
